## MIZA Desktop Rack

Technical Specifications

## MIZA Desktop Rack:

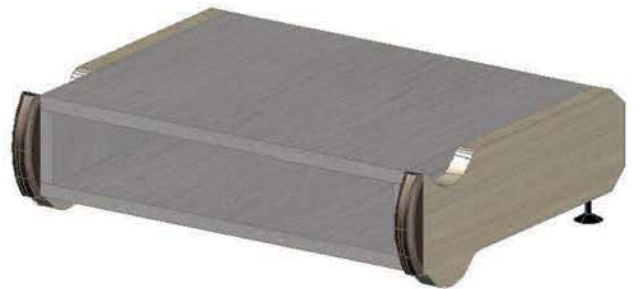

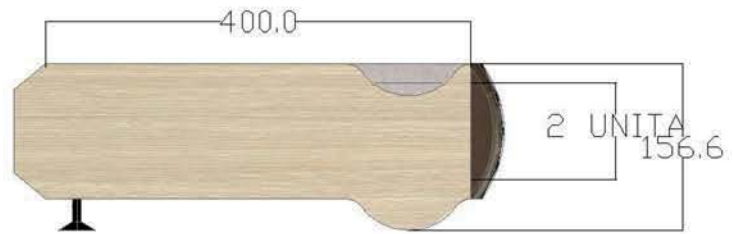

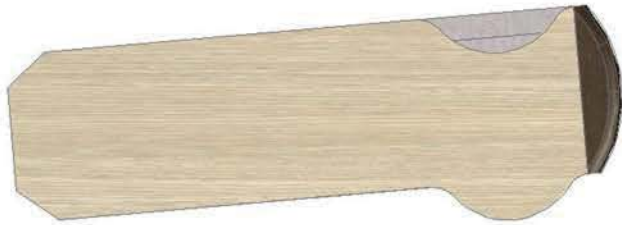

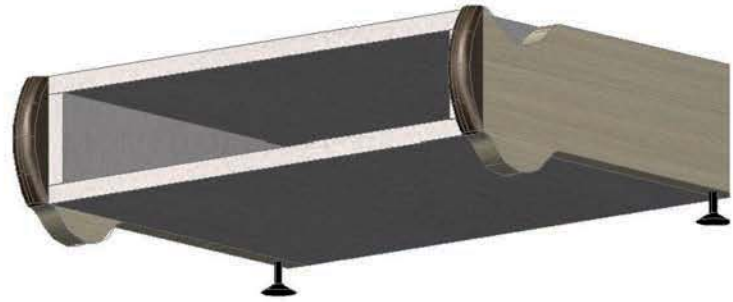

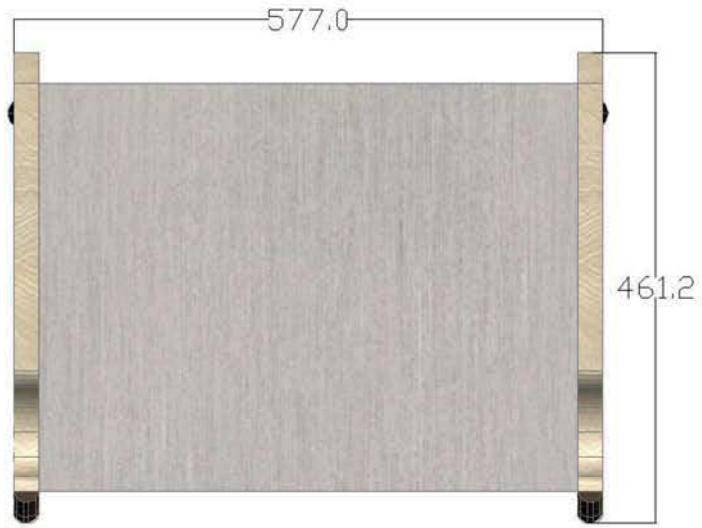

MIZA Desktop Racks come in three sizes (2, 4 or 6 rack units) as well and complement the series with some further rackspace for 19" rack-able gear. Admittedly, the amount of outboard is shrinking, but there are still a large number of you out there who own a nice Armada of external processors. Their modular system enables you to build them up according to your needs and possibilities. With an open architecture, heat is not a problem, plenty of airflow through the rack gives you enough circulation to keep your 'babies' nice and fresh.

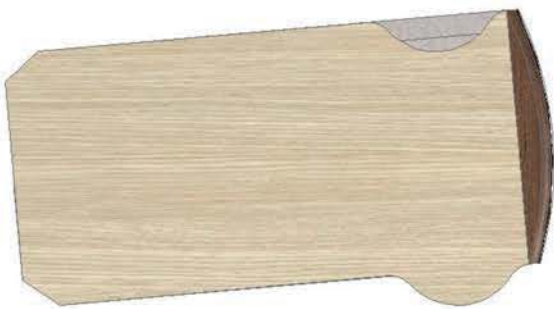

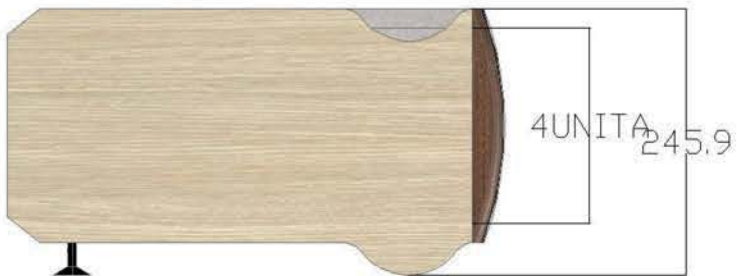

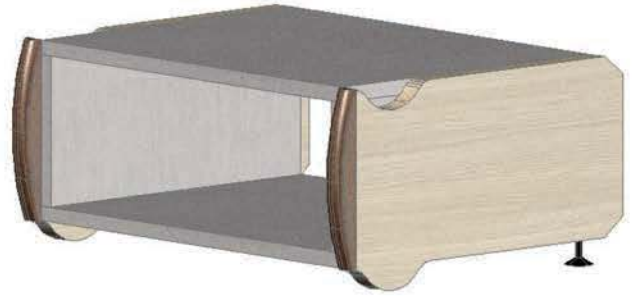

### Specifications:

- Height: 156 - 246 - 336 mm
- Depth: 461 mm
- Width: 577 mm
- Modular system
- Inclinable
